

### **Shop Update (1.4.1 to 1.4.2):**

This update will be workable if the installed version is 1.4.1 .

1. Log in to your cPanel. Open File Manager.
2. Open the folder where your running script is located.
3. Upload the application.zip file from updates/1.4.1\_to\_1.4.2/application.zip which is downloaded from CodeCanyon to your server where your script is running.
4. Extract the zip file in the root directory of the running script. ( Example: if your script is located in the public\_html/shop in the server. Then, public\_html/shop is the root directory.)
5. Go to PhpMyAdmin and open the database of your running script.
6. Import the sql file which is provided in the downloaded file.
